

PRELIMINARY AMENDMENT
CPA of U.S. Appln. No. 09/254,005

*Sub
CPA*

3. (Twice Amended) A consolidated material of coated powders each comprising a base particle having thereon plural coating films having a uniform thickness of 0.01 to 5 μm per film in which at least any adjacent coating films are different in kind, wherein the coated powders are mutually adhered at the outermost coating film, the base particle comprises a glass, a metal, or a metal oxide, and the coating films are each a metal film or a metal oxide film, wherein the coated powders constituting the consolidated material are arranged at the same distance from one another in a given direction and are united into said consolidated material while maintaining the same distance in a given direction.
